EDUCATION

University of Texas at Austin,
Ph.D Student in Computer Sciences

Austin, USA
Aug 2022-Present

- Advisor: Professor Qiang Liu, Professor Nhat Ho
- GPA: 4.00/4.00

Ha Noi University of Science and Technology (HUST)
Bachelor of Information Technology, Program of Talented Engineers

Ha Noi, Vietnam
Aug 2014 - Jun 2019

- Supervisor: Professor Khoat Than
- Thesis title: “[An effective Bayesian approach for discovering hidden semantics from data streams](#)”
- GPA: 3.50/4.00 (rank 2/21 honored class), Thesis: 4.00/4.00 (Best Thesis Award)

EXPERIENCE

VinAI Research,
AI Research Resident

Ha Noi, Vietnam
Jul 2020-Jul 2022

- Main research topics: Bayesian Deep Learning, Deep Generative Models, Optimal Transport.
- Advisor: Dr. Nhat Ho (Assistant Professor at UT, Austin)

Data Science Laboratory,
Research Assistant

Ha Noi, Vietnam
Aug 2018 - Jul 2020

- Main research topics: Probabilistic Graphical Model, Bayesian inference, Online Learning.
- Advisor: Dr. Khoat Than (Associate Professor at HUST)

Viettel Network Technology R&D Center
Internship, Department of Data Science

Ha Noi, Vietnam
Jun 2018 - Jun 2019

- Projects: Data Analysis in Telecommunication, Recommendation Systems for Promotions

RESEARCH
INTERESTS

My research intersects probabilistic modeling, deep learning, and optimization, aiming to integrate the complementary advantages of these areas into foundation problems of modeling, inference, and learning. Currently, my work focuses on developing efficient and theoretically sound optimization algorithms for large-scale deep learning with non-conventional constraints. I am also particularly excited about scalable and robust probabilistic methods applied to complex settings across diverse domains, including Bayesian deep learning, deep generative models, hierarchical Bayesian models, and online/continual learning.
